

Kumbhika fruit in shape, which
 burst and are again filled
 with pus, are called Kumbhikas.
 Pustules to the size of red
 mustard seeds, which appear on the
 eye-lids, attended with
 pain, heaviness, discharge and
 an itching sensation, are
 called Pothakis. Thick and rough
 pustules appearing on
 the eye-lids, surrounded by a crop of
 small pustules, are called
 Vartma-Sharkaras, which vitiate the eye-
 lids. Pustules, to the
 size of Ervaruka seeds, and with
 pointed heads, and which
 are glossy and attended with a slight
 pain, are called Arsho-
 Vartmas. Hard, long, papilous
 growths, devoid of discharge
 and occurring within the eye-lids,
 are called Sushkarshas.
 Sift and copper-coloured pustulæ
 occurring within the eye-
 lids, attended with a burning sensation and
 an aching pain,
 are called Anjana-namikas. In the
 disease known as Vahula
 Vartma, the eye-lids become studded over
 with hard pustules,
 of the same colour with the surrounding
 skin. The disease in
 which the eye-lids cannot be
 opened in consequence of
 the appearance of a slightly painful
 and itching swelling
 therein, is called Vartma-Vandhaka.
 The disease in which
 the eye-lids suddenly become soft,
 and red or copper
 coloured, attended with a little
 pain and discharge, is
 called Klishta-Vartmaka. If a
 discharge is set up in the
 eye-lids in consequence of the
 aggravation of the derange-
 ment of blood and Pitta, the disease is
 called Vartma-Kardama.
 The disease in which the inner sides of
 the eye-lids assume
 a tawny brown colour and are attended

with an aching pair
 is called S'ydva-Vartma. The disease in
 which the exteriors
 of the eye-lids become marked by slight
 pain and swelling,
 and the interiors are characterised by
 a discharge is called
 Praklinna-Vartma. The disease in which
 the eye-lids, whether
 washed or unwashed, become
 agglutinated, is called Aklinna
 Vartma. In the disease known as
 Vatahata Vartma the eyes
 are found to squint owing to the looseness
 of the unions of the
 eye-lids and sclerotic. A slightly
 painful, rose-coloured
 tumour (cyst), irregular in shape and
 rapid in its growth, is
